

School of Biological Sciences Seminar Program presents:
The Science of Teaching:
Evidence-Based approaches in Biology Education

**Beyond content, redefining and teaching for broad success
in higher education classrooms**

Dr. Bryan Dewsbury

Associate Professor, Department of Biological Sciences
Florida International University

Friday, May 2, 2025
10:00 AM – 11:00 AM

Kavli Auditorium, 3201 Tata Hall
Zoom Meeting ID: 991 3814 1408

Light refreshments will be provided

Abstract: Traditional mindsets and approaches to teaching privileges subject matter expertise as the only necessary requirement. Our current understanding of teaching effectiveness demonstrates that addressing the whole student is useful for both academic and social outcomes. In this talk I will make the case for both the value proposition and values associated with this approach with examples from a Biology classroom.
