# UCSD-XULA SUMMER RESEARCH PROGRAM

My experience at UCSD was wonderful! I am so happy I was able to attend this program because it not only exposed me to a wider range of research, but I also acquired a greater comfort with applying to graduate school. Everyone that I met throughout my 8 weeks was welcoming and helpful. I was able to network and learn about the various research fields that are being conducted at UCSD. I think this program is an amazing opportunity that has helped me expand my knowledge on what I initially thought graduate school was.

*Selena Gray (2017 participant)*

"The STARS Program at UC San Diego provided the opportunity to participate in research at one of the top facilities in the country while also enjoying all that the beautiful coast of Southern California has to offer!"

*Emily Wilson (2017 participant)*

## WHY APPLY?

Grad prep	Top research labs
Networking with students from UCSD and HBCU's	Empower your future and be a STAR!

Students who complete the program and are accepted into a graduate program in the University of California (any campus) will receive multi-year graduate funding!

The goal of the program is to provide summer research experiences and graduate prep for students interested in pursuing a graduate degree (MS or PhD).

We immerse students in scientific training and offer them a taste of life as a graduate student.
